Dear FCC:

I've been licensed as an Amateur Radio Operator for almost twenty years. Besides being a hobby, the function of Amateur Radio has been integrated in the fabric of Homeland Security for emergenecy purposes. Please be so kind to rethink this decision about removing Our allocated bands and frequencies. We worked hard to get our licence upgrades , and we do NOT need this horrible scare tactic looming above our heads.. I vote to maintain what is already in place. Thanks !

Regards,

Lee Kornilieff
